

Lions Exchange Hong Kong 2018-2019

My trip started together with a dutch guy. We flew on the 07 of June from Brussels tot Hong Kong. After meeting our hostparents, we met the group. The fact that we know each other from the first week made us as group very close. I got inspired by all different peoples, humour and habits. Did was also at the international night.

I made some good friends.

We went to three different camps. First, we went to Luoyang. The first thing what I noticed, as Dutch girl, is that there were many bicycles. But also, the contrast between the poor streets and the luxury malls. I did like the beautiful hotel at the last day, but I prefer a hostel. It is more fun when you are with a group. It is also more bonding.

After the China camp, we went back with the train to the Hong Kong Camp. The train was a good option to travel. The nicest evening was the barbecue. We had fun and played a lot of games that evening with each other. Everybody putted their mobile phone away and concentrated on the group.

The Macao camp was more luxury and the wifi was good, so every evening there were more people on the mobile. That's too bad.

The most beautiful thing I saw during the trip was the Tian Tan Buddha and the nature were the Buddha is surrounded by. The party was also very nice hahaha.

I am sure I will meet some people of this amazing group again.

P.s. because of all the nice things we did, I was very sleepy in the bus. People did like to take pictures of that hahahaha:

After all I want to say; I really recommend this Lions trip. It was a trip that I won't forget and I made friends for life! I still have good contact with some of them.
